

# Installing keyboard layouts on OS X

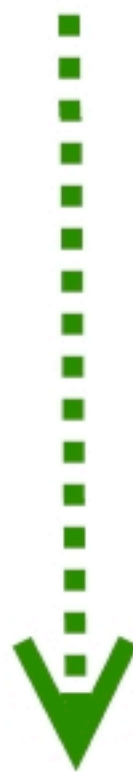

1. Locate the keyboard file, "ISalishUC.keylayout" on the install disk.  
(Salsh keyboarding > Salish Unicode > Mac)

2. Open the Keyboard Layouts folder on your computer.  
(Macintosh HD > Users > 'Account Name' > Library > Keyboard Layouts)

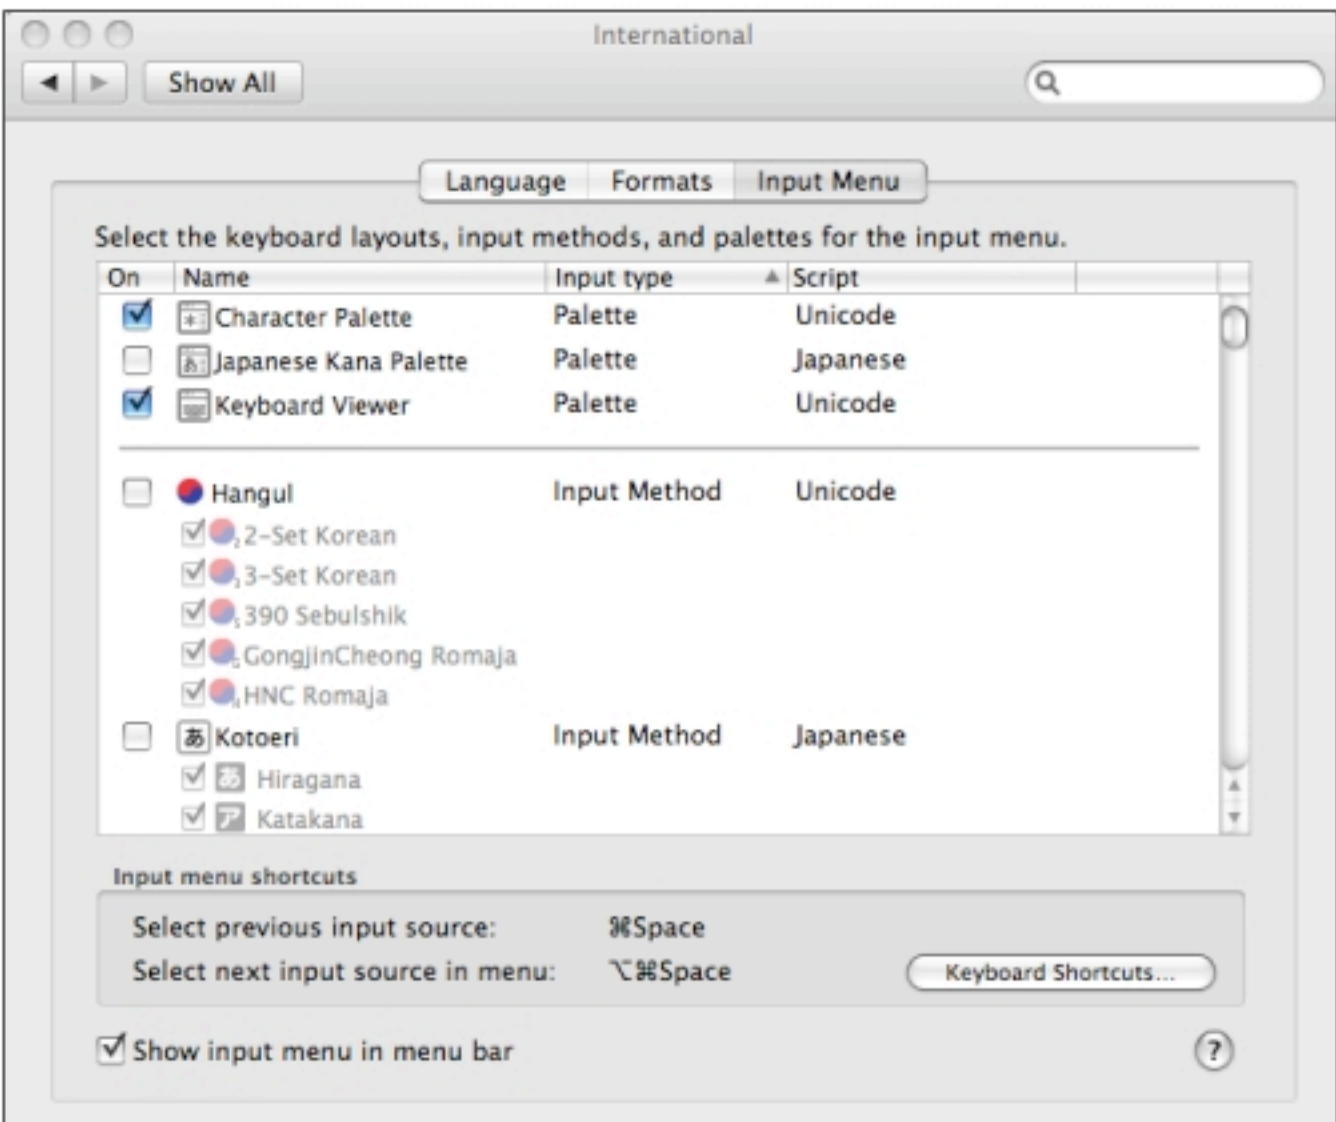

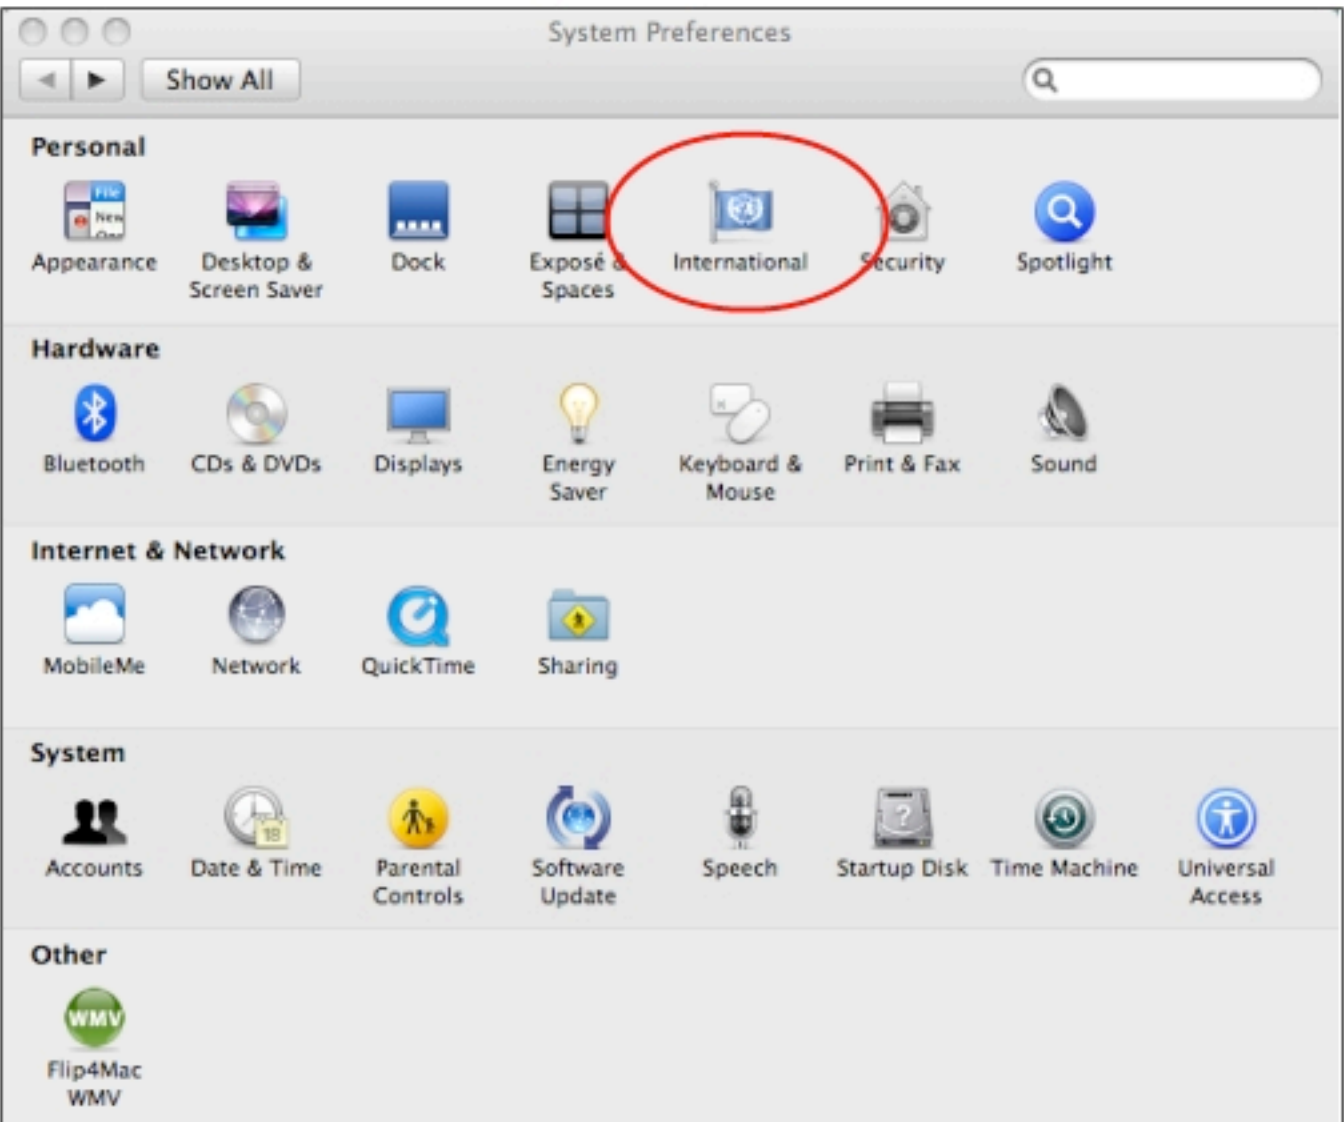

3. Copy the layout file from the install disk to the folder.
4. Log out of the current user account and then log back in.

5. Open the International pane of System Preferences.

6. Select Input Menu and scroll down until you find Interior Salish UC . Check the box.

7. To type in Salish, select Interior Salish UC from the available keyboards in your menu bar.
