wanapumK_amd64.msi	4/16/2019 1:59 PM	Windows Installer ...	128 KB
wanapumK_i386.msi	4/16/2019 1:59 PM	Windows Installer ...	128 KB
wanapumK_ia64.msi	4/16/2019 1:59 PM	Windows Installer ...	128 KB

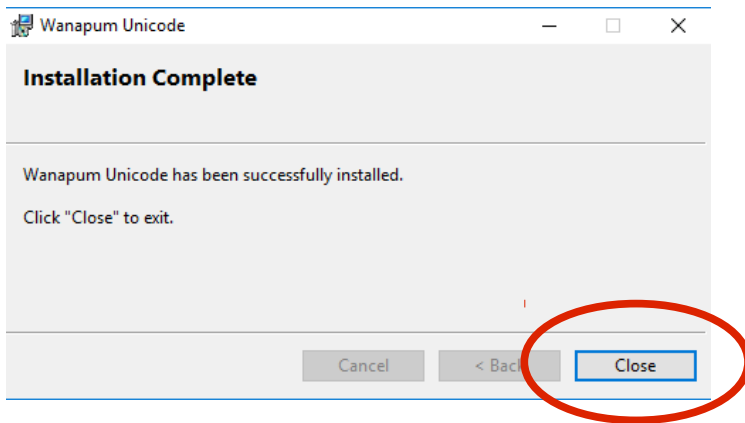

3. The install icon should  
appear blinking on your  
task bar. Click on it, and  
when the user account  
control window opens,  
click on OK.

4. If a keyboard is  
already present,  
the installer will  
ask you to remove  
or repair. Select  
“repair” and click  
“finish”.

4. If the keyboard installs, you will see the completion window. Click on “close”.

5. The keyboard switch should appear on your taskbar. Click on it to choose the keyboard for your language.

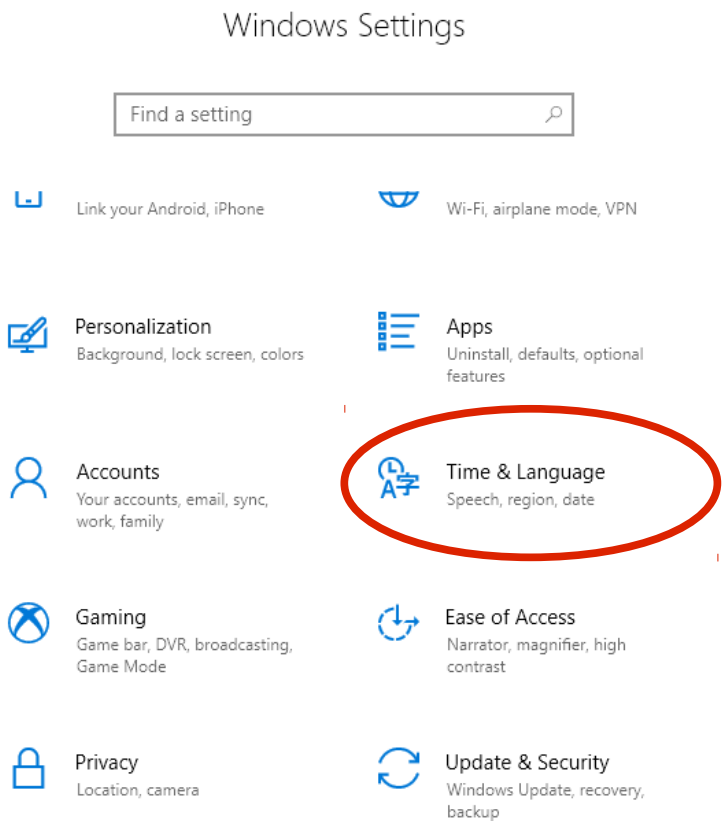

If your keyboard is NOT shown, proceed below to complete the install.

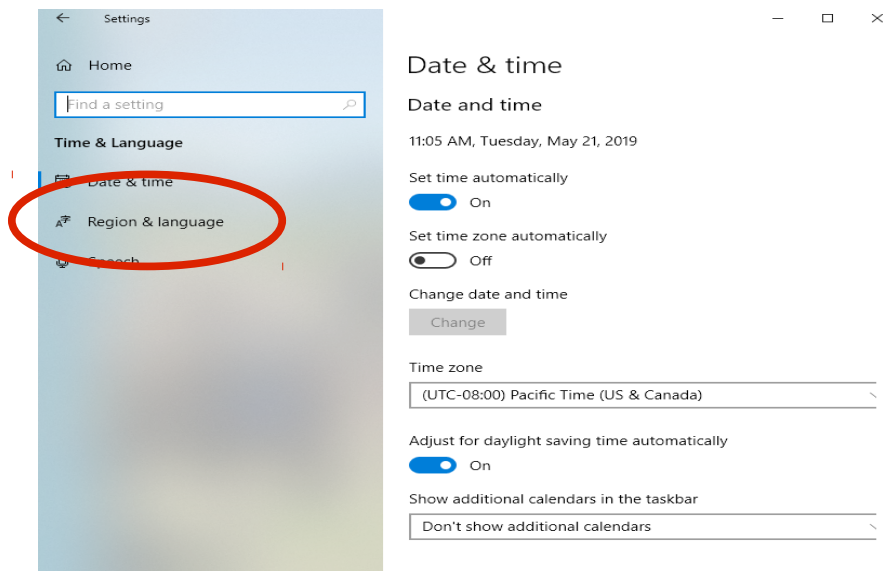

1. Open the Windows menu, and click on “Settings”

## 2. Click on “Time & Language”

## 3. Click on “Region & Language”.

## 4. In the Region & Language pane, click below where your current language is shown.

5. Click on the button,  
“options” where it appears.

## Region & language

English (United States)

### Preferred languages

Apps and websites will appear in the first language in the list that they support.

Add a language

English (United States)  
Windows display language (override)
